

COMMON LANGUAGE® Customer Service Bulletin NEP-05-22-2009.1

May 22, 2009

Equipment Information Services (CLEI™ Codes) Clients:

The URL link below represents the CLEI extract schedule for 2009:

http://www.commonlanguage.com/resources/commonlang/productshowroom/showroom/equip_id/vendors/CLEI_Code_Extract_Schedule_tables_2009.pdf

CLEI coded items that are on “Manufacturer Hold” per a manufacturer’s request are not included in the extract process.

Since the extracts are available on set dates, there is lag time between a new CLEI code created, attribute data updated, or an on-hold item being released and a client receiving the extract. A recently updated CLEI coded item may appear in the equipment registry via the CLEI Inquiry, but it may not be usable to the client until the next extract is generated and applied to their environment.

Please contact me if you have any questions.

Sincerely,

Shyhyann Lee
