

COMMON LANGUAGE® Customer Service Bulletin NEP-07-25-2008.1

July 25, 2008

In order to better serve our NEP customers, Telcordia Common Language is improving our communication methods. First we've enhanced our website (www.commonlanguage.com) to provide easier navigation for our NEP customers. Details can be found by clicking on the "Network Element Providers" link in left navigation bar of the Common Language home page.

Telcordia will also be creating a new *NEP Attribute Report* to help identify CLEI™ codes that are missing GR-485-CORE attributes. We will be providing a draft *NEP Attribute Report* for your review and feedback based on the following schedule:

- 8/8/08: distribution list for CSB and *NEP Attribute Report* finalized
- 8/11/08: Prototype *NEP Attribute Report* available on Common Language web site for NEP customer review (future CSB to define accessing)
- 8/20/08: Feedback due from NEP customers (future CSB to define process)
- 8/31/08: *NEP Attribute Report* mailed to recipients

The *NEP Attribute Report* will replace the existing outEA.xls file. The outEA.xls report will no longer be distributed. If you have questions about your company's CLEI codes related to missing attributes prior to 8/31/08, you can contact either Bob Willoughby (rwilloug@telcordia.com 732 699-8647) or Scott Bockowski (sbockows@telcordia.com 732 699-2799).

Finally, if you are receiving this CSB in error, or are aware of another company member that should receive this CSB and has not, please notify Telcordia at CLPCC@telcordia.com (877) 699-5577.

Thank you,

Robert Lindquist
Director, Common Language Technical Standards and Support
