

COMMON LANGUAGE® Customer Service Bulletin NEP-12-01-2008

December 1, 2008

This is to inform you of proposed changes to the Common Language CLEI Request Form based on NEP feedback.

Version 7-1-A captures the following proposed changes:

- Heat Dissipation – In order to properly reflect information found in the current issue of the GR-485-CORE (Issue 5). Columns 'BX' and 'BY' were moved to columns 'BJ' and 'BK' of the New Item Request tab. According to the current issue, Heat Dissipation is for all equipment types, and not isolated to hardwired equipment.
- Add drop-down menu of Nouns to column 'F' of the New Item Request tab.
- Add intelligence to columns 'AL' and 'AP' of the New Item Request tab (Input Voltage; if DC then Input Frequency cells populate with N/A; if AC then Input Frequency cells populate with Hz).
- Isolate drop-down menu for HMI field to only HMI column (column 'J') of the New Item Request tab.
- The title of column 'J' in the PCN Change Request tab now reads as: The following columns (K-BJ) need only be completed if changed from "Old referenced equipment" or previously not provided. The previous title of column 'J' read: The following columns (K-BJ) need only be completed if changed from "Old referenced equipment".
- Removed the System ID (R4-1) section from the Request Information tab and added it to the New Item Request tab (Column 'F') and the PCN Change Request tab (Column 'D'). This change allows for a more direct reference between requested item and its related System ID especially when a single item may be associated with multiple System ID's or when multiple request items within a given request support various System IDs.
- In accordance with GR-485-CORE (Issue 5) System Name has been changed to read System ID.

The proposed changes are in compliance with GR-485-CORE issue 5 and do not alter the information required for CLEI code creation.

The proposed CLEI request form (Version# GR-485-CORE_Sec_5_Request_7-1-A) can be found at:

http://www.commonlanguage.com/resources/commonlang/productshowroom/showroom/equip_id/vendors/equipCode_Form_DRAFT.xls

Please provide feedback to David Oliver by 12/12/2008. If no issues are raised by 12/12/2008, Version 7-1-A will be posted on the Common language website and used as the official CLEI Request Form effective 12/19/2008. Version 7-0-L will become obsolete at that time.

Thank you,

David Oliver
